AI FOR HVAC, PLUMBING & HOME SERVICES

The Field Service Playbook for AI Phone Systems

The Industry-Specific Guide for Heating, Cooling, Plumbing, Electrical, Roofing, and Pest Control

By Sanjay Shharma

INTRODUCTION

You run an HVAC, plumbing, electrical, roofing, or pest control company. You lose 30-60% of your calls to missed-call chaos. You have heard about AI receptionists. You have decided to deploy one. You need the industry-specific playbook.

This book is the industry-specific playbook. The book is what you read after signing the vendor contract and before going live. The book is the day-by-day guide that takes you from "I just signed the contract" to "I have a working AI receptionist that handles every home services call."

In the next 200+ pages, you will learn:

- **The 6 industries** covered (HVAC, plumbing, electrical, roofing, pest control, cleaning)
- **The 30+ emergency scenarios** the AI must handle (no AC in summer, no heat in winter, burst pipe, gas leak, etc.)
- **The 25+ call types** the AI must handle (service calls, estimates, installations, emergencies, warranty, follow-up)
- **The 12 industry-specific scripts** the AI must have (copy-paste ready)

- **The 5 industry-specific integrations** (ServiceTitan, Housecall Pro, Jobber, ServiceFusion, FieldEdge)
- **The 7 industry-specific case studies** of field service companies that deployed AI receptionists
- **The 8 industry-specific mistakes** to avoid
- **The 7-day industry-specific deployment plan**
- **The 90-day industry-specific transformation plan**

This book is written for the home services business owner who wants to deploy an AI receptionist that understands the field service industry. The book is the same playbook I use when advising HVAC, plumbing, and home services clients on \$10K+ AI deployments. The playbook works for \$299/month plans. The playbook works for \$1,500/month plans. The playbook is the foundation of the missed-call solution.

Let's get started.

□ KEY TAKEAWAYS

- **The 25+ call types** the AI must handle (service calls, estimates, installations, emergencies, warranty, follow-up)
- **The 30+ emergency scenarios** the AI must handle (no AC in summer, no heat in winter, burst pipe, gas leak, etc.)
- **The 5 industry-specific integrations** (ServiceTitan, Housecall Pro, Jobber, ServiceFusion, FieldEdge)
- **The 7 industry-specific case studies** of field service companies that deployed AI receptionists
- **The 6 industries** covered (HVAC, plumbing, electrical, roofing, pest control, cleaning)
- **The 12 industry-specific scripts** the AI must have (copy-paste ready)
- **The 90-day industry-specific transformation plan**

PART 1: THE INDUSTRY OVERVIEW

PHASE 1: UNDERSTAND THE FIELD SERVICE AI LANDSCAPE

CHAPTER 1: WHY THE FIELD SERVICE INDUSTRY LOSES MORE CALLS THAN ANY OTHER

The field service industry (HVAC, plumbing, electrical, roofing, pest control, cleaning) loses more calls than any other industry. The reasons are:

Reason 1: Field technicians are not in the office. HVAC technicians are on rooftops. Plumbers are under sinks. Electricians are in attics. The technicians cannot answer the phone. The office staff is overwhelmed. The result: 30-60% of calls are missed.

Reason 2: Calls are time-sensitive. Field service calls are often emergencies. The customer is not going to wait. The customer is going to call the next contractor. The result: 70%+ of missed-call customers never call back.

Reason 3: Calls are seasonal. HVAC is seasonal (summer for AC, winter for heating). Plumbing is less seasonal but has peaks (frozen pipes in winter, backups in spring). The seasonal peaks overwhelm the office staff. The result: 50%+ of calls are missed during the peak.

Reason 4: Field technicians are not customer service trained. The technicians are trained to fix things, not to answer phones. The technicians are frustrated by phone interruptions. The technicians do not return calls promptly. The result: 60%+ of customers do not get a return call within 1 hour.

The 4 reasons are the foundation of the missed-call crisis in field service. The crisis costs the average HVAC company \$200K-\$500K per year in lost revenue. The crisis costs the average plumbing company \$150K-\$400K per year in lost revenue. The crisis costs the average electrical company \$100K-\$300K per year in lost revenue.

The AI receptionist solves the crisis. The AI answers every call. The AI handles the emergencies. The AI books the

appointments. The AI frees the technicians to focus on the work. The AI frees the office staff to focus on the customers. The AI is the foundation of the missed-call solution.

The Field Service AI Market

The field service AI market is growing rapidly. The market is driven by 4 trends:

Trend 1: Increasing customer expectations. Customers expect 24/7 coverage. Customers expect instant response. Customers expect 1-hour callback. The expectations are the foundation of the missed-call crisis.

Trend 2: Labor shortage. The field service industry is facing a labor shortage. The shortage is the foundation of the staffing crisis. The staffing crisis is the foundation of the missed-call crisis.

Trend 3: Rising customer acquisition costs. The cost of acquiring a new field service customer is \$200-\$500. The rising cost is the foundation of the missed-call problem. The missed-call problem is the foundation of the AI solution.

Trend 4: AI technology maturity. AI voice technology is now accurate enough for phone calls. The maturity is the foundation of the AI receptionist. The AI receptionist is the foundation of the missed-call solution.

The 4 trends are driving the field service AI market. The market is projected to grow at 32% CAGR from 2024 to 2030. The market will reach \$12.8B by 2030. The market is the foundation of the AI opportunity. The opportunity is the foundation of the AI deployment.

The 6 Field Service Industries

This book covers 6 field service industries:

Industry 1: HVAC. Heating, ventilation, and air conditioning. Includes AC repair, AC installation, heating repair, heating installation, ductwork, indoor air quality, maintenance plans.

Industry 2: Plumbing. Includes water heater repair, water heater installation, drain cleaning, sewer line repair, leak detection, pipe repair, fixture installation, gas line repair, sump pump.

Industry 3: Electrical. Includes electrical repair, electrical installation, panel upgrade, wiring, lighting, generator installation, EV charger installation, smart home.

Industry 4: Roofing. Includes roof repair, roof replacement, roof inspection, gutter installation, gutter cleaning, storm damage repair.

Industry 5: Pest Control. Includes termite treatment, rodent control, insect control, wildlife removal, bed bug treatment, mosquito control.

Industry 6: Cleaning. Includes house cleaning, deep cleaning, move-out cleaning, post-construction cleaning, carpet cleaning, window cleaning.

The 6 industries share the same missed-call crisis. The 6 industries share the same AI solution. The 6 industries differ in the specific scripts, integrations, and emergency handling.

Your Action Step

Recognize that the field service industry loses more calls than any other industry. Commit to the AI deployment. The AI is the foundation of the missed-call solution.

□ KEY TAKEAWAYS

- Recognize that the field service industry loses more calls than any other industry. Commit to the AI deployment. The AI is the foundation of the missed-call solution.
- The field service industry (HVAC, plumbing, electrical, roofing, pest control, cleaning) loses more calls than any other industry. The reasons are:

- The field service AI market is growing rapidly. The market is driven by 4 trends:
- This book covers 6 field service industries:
- The 6 Field Service Industries

CHAPTER 2: THE 30+ EMERGENCY SCENARIOS THE AI MUST HANDLE

Field service is the industry of emergencies. The customer does not call when everything is fine. The customer calls when something is broken. The customer calls when something is leaking. The customer calls when something is dangerous. The AI must handle every emergency.

The AI must handle 30+ emergency scenarios. The scenarios are organized by industry. The scenarios are the foundation of the emergency handling.

HVAC Emergencies (8 Scenarios)

Emergency 1: No AC in summer. Customer has no AC when temperature is above 90°F. Priority: Urgent (same-day). Action: Book same-day appointment + send tech name.

Emergency 2: No heat in winter. Customer has no heat when temperature is below 40°F. Priority: Urgent (same-day). Action: Book same-day appointment + send tech name.

Emergency 3: AC leaking water. Customer sees water leaking from AC unit. Priority: Urgent (same-day). Action: Book same-day appointment + advise to turn off unit.

Emergency 4: Furnace making noise. Customer hears strange noise from furnace. Priority: Same-day. Action: Book same-day appointment.

Emergency 5: Gas smell from furnace. Customer smells gas near furnace. Priority: Emergency (immediate). Action: Advise to leave home + call gas company + dispatch on-call tech.

Emergency 6: AC unit frozen. Customer sees ice on AC unit. Priority: Same-day. Action: Book same-day appointment + advise to turn off unit.

Emergency 7: Thermostat not working. Customer's thermostat is unresponsive. Priority: Same-day. Action: Book same-day appointment.

Emergency 8: Carbon monoxide alarm. Customer's CO alarm is sounding. Priority: Emergency (immediate). Action: Advise to leave home + call 911 + dispatch on-call tech.

Plumbing Emergencies (8 Scenarios)

Emergency 9: Burst pipe. Customer has a burst pipe. Priority: Emergency (immediate). Action: Advise to shut off main water valve + dispatch on-call tech.

Emergency 10: Sewer backup. Customer has sewer backup. Priority: Emergency (immediate). Action: Advise to stop using water + dispatch on-call tech.

Emergency 11: No water. Customer has no water in the home. Priority: Urgent (same-day). Action: Book same-day appointment.

Emergency 12: Water heater leaking. Customer's water heater is leaking. Priority: Urgent (same-day). Action: Book same-day appointment + advise to turn off water heater.

Emergency 13: Clogged toilet (only toilet). Customer has only one toilet and it is clogged. Priority: Urgent (same-day). Action: Book same-day appointment.

Emergency 14: Gas leak. Customer smells gas. Priority: Emergency (immediate). Action: Advise to leave home + call gas company + dispatch on-call tech.

Emergency 15: Slab leak. Customer suspects a slab leak (water on floor with no visible source). Priority: Urgent (same-day). Action: Book same-day appointment.

Emergency 16: Sump pump failure. Customer's sump pump has failed and water is rising. Priority: Emergency (immediate). Action: Dispatch on-call tech.

Electrical Emergencies (6 Scenarios)

Emergency 17: No power in part of home. Customer has partial power outage. Priority: Urgent (same-day). Action: Book same-day appointment.

Emergency 18: Total power outage. Customer has no power. Priority: Urgent (same-day). Action: Book same-day appointment + check if it's a neighborhood outage.

Emergency 19: Burning smell from outlet. Customer smells burning from an outlet. Priority: Emergency (immediate). Action: Advise to turn off breaker + dispatch on-call tech.

Emergency 20: Sparking outlet or switch. Customer sees sparking. Priority: Emergency (immediate). Action: Advise to turn off breaker + dispatch on-call tech.

Emergency 21: Electrical fire. Customer has an electrical fire. Priority: Emergency (immediate). Action: Advise to call 911 first + dispatch on-call tech.

Emergency 22: Downed power line. Customer sees a downed power line. Priority: Emergency (immediate). Action: Advise to stay away + call utility company.

Roofing Emergencies (4 Scenarios)

Emergency 23: Active roof leak. Customer has water coming through the ceiling. Priority: Emergency (immediate). Action: Advise to place bucket + dispatch on-call tech.

Emergency 24: Storm damage. Customer has roof damage from a storm. Priority: Urgent (same-day). Action: Book same-day appointment + offer tarp service.

Emergency 25: Tree on roof. Customer has a tree on the roof. Priority: Emergency (immediate). Action: Dispatch on-call tech + tree service.

Emergency 26: Missing shingles. Customer is missing many shingles. Priority: Same-week. Action: Book appointment within 1 week.

Pest Control Emergencies (3 Scenarios)

Emergency 27: Termite swarm. Customer sees a termite swarm. Priority: Urgent (same-day). Action: Book same-day inspection.

Emergency 28: Rodent in home. Customer has a rodent in the home. Priority: Urgent (same-day). Action: Book same-day appointment.

Emergency 29: Wasp/bee nest. Customer has a wasp/bee nest near the home. Priority: Urgent (same-day). Action: Book same-day removal.

Cleaning Emergencies (2 Scenarios)

Emergency 30: Sewage backup (cleaning). Customer has sewage backup that needs cleaning. Priority: Urgent (same-day). Action: Book same-day appointment + dispatch on-call crew.

Emergency 31: Flood damage. Customer has flood damage that needs cleaning. Priority: Urgent (same-day). Action: Book same-day appointment + dispatch on-call crew.

The 31-Emergency Configuration Process

The AI must be configured to handle all 31 emergencies. The configuration process is the foundation of the emergency handling.

Step 1: Add all 31 emergencies to the AI's escalation rules.

Step 2: For each emergency, define: priority, AI response, AI action, and routing.

Step 3: Test each emergency with a sample call.

Step 4: Document the configuration.

Step 5: Train the team on the escalation process.

The 5-step configuration process is the foundation of the emergency handling. The emergency handling is the foundation of the missed-call solution.

Your Action Step

Add all 31 emergencies to your AI's escalation rules. Test each emergency. The emergencies are the foundation of the customer service. The emergencies are what every AI must handle.

□ KEY TAKEAWAYS

- The 5-step configuration process is the foundation of the emergency handling. The emergency handling is the foundation of the missed-call solution.
- The AI must handle 30+ emergency scenarios. The scenarios are organized by industry. The scenarios are the foundation of the emergency handling.
- The AI must be configured to handle all 31 emergencies. The configuration process is the foundation of the emergency handling.
- Pest Control Emergencies (3 Scenarios)
- The 31-Emergency Configuration Process
- Electrical Emergencies (6 Scenarios)
- Plumbing Emergencies (8 Scenarios)

CHAPTER 3: THE 25+ CALL TYPES THE AI MUST HANDLE

The AI must handle 25+ call types. The call types are the foundation of the call handling. The call types cover every reason a customer calls a field service company.

The call types are organized into 6 categories: service, sales, billing, warranty, follow-up, and admin.

Category 1: Service Calls (8 Types)

Type 1: New service call. Customer wants to schedule a new service call. AI books the appointment.

Type 2: Emergency service call. Customer has an emergency. AI escalates immediately.

Type 3: Same-day service call. Customer wants a same-day service call. AI checks availability + books if available + offers next available if not.

Type 4: Diagnostic call. Customer wants a diagnostic. AI books the diagnostic appointment.

Type 5: Repair call. Customer wants a repair. AI books the repair appointment.

Type 6: Maintenance call. Customer wants a maintenance. AI books the maintenance appointment.

Type 7: Tune-up call. Customer wants a tune-up. AI books the tune-up appointment.

Type 8: Inspection call. Customer wants an inspection. AI books the inspection appointment.

Category 2: Sales Calls (6 Types)

Type 9: New system quote. Customer wants a quote for a new system (AC, furnace, water heater, etc.). AI qualifies the lead + routes to sales.

Type 10: Replacement quote. Customer wants a quote for a replacement system. AI qualifies the lead + routes to sales.

Type 11: Installation quote. Customer wants a quote for an installation. AI qualifies the lead + routes to sales.

Type 12: Free estimate. Customer wants a free estimate. AI books the estimate appointment.

Type 13: Financing inquiry. Customer wants to know about financing. AI provides financing info + routes to sales.

Type 14: Special offer inquiry. Customer wants to know about special offers. AI provides offer info + books the appointment.

Category 3: Billing Calls (4 Types)

Type 15: Bill question. Customer has a question about a bill. AI routes to billing.

Type 16: Bill dispute. Customer disputes a bill. AI escalates to manager.

Type 17: Payment. Customer wants to make a payment. AI takes payment via text link or routes to billing.

Type 18: Refund request. Customer wants a refund. AI escalates to manager.

Category 4: Warranty Calls (3 Types)

Type 19: Warranty claim. Customer wants to make a warranty claim. AI books the warranty appointment + sends claim form.

Type 20: Warranty question. Customer has a question about warranty. AI provides warranty info.

Type 21: Warranty status. Customer wants to check warranty status. AI routes to customer service.

Category 5: Follow-Up Calls (3 Types)

Type 22: Satisfaction follow-up. Customer just had service and is being called for satisfaction. AI conducts the survey.

Type 23: Review request. Customer just had service and is being asked for a review. AI sends the review link.

Type 24: Referral request. Customer just had service and is being asked for a referral. AI sends the referral offer.

Category 6: Admin Calls (1 Type)

Type 25: General question. Customer has a general question (hours, location, services, service area). AI handles using FAQ scripts.

The 25-Type Configuration Process

The AI must be configured to handle all 25 call types. The configuration process is the foundation of the call handling.

Step 1: Add all 25 call types to the AI's intent recognition.

Step 2: For each call type, define: AI response, AI action, and routing.

Step 3: Test each call type with a sample call.

Step 4: Document the configuration.

Step 5: Train the team on the routing.

The 5-step configuration process is the foundation of the call handling. The call handling is the foundation of the missed-call solution.

Your Action Step

Add all 25 call types to your AI's intent recognition. Test each call type. The 25 call types are the foundation of the call handling. The call handling is the foundation of the missed-call solution.

□ KEY TAKEAWAYS

- The AI must handle 25+ call types. The call types are the foundation of the call handling. The call types cover every reason a customer calls a field service company.
- The 5-step configuration process is the foundation of the call handling. The call handling is the foundation of the missed-call solution.
- The AI must be configured to handle all 25 call types. The configuration process is the foundation of the call handling.
- The call types are organized into 6 categories: service, sales, billing, warranty, follow-up, and admin.
- Category 5: Follow-Up Calls (3 Types)
- Category 4: Warranty Calls (3 Types)
- Category 1: Service Calls (8 Types)

**PART 2: THE 12
INDUSTRY-SPECIFIC
SCRIPTS**

ABOUT THE AUTHOR & THE AI MASTERY FLEET

Executive Leadership, Autonomous Architecture & Enterprise B2B Systems

ENJOYED THIS FREE OPENING SAMPLE?

You have just experienced the foundational chapters of **AI Front Desk for HVAC, Plumbing & Home Services**. To unlock the complete, unabridged masterwork (including all production code snippets, architecture schemas, system prompts, and client onboarding SOPs), order instant digital access or print editions below:

- **Official Digital Store:** <https://books.adorisedigital.com> (Instant PDF + Kindle EPUB)
- **Global Digital Storefront:** <https://adorisedigital.gumroad.com> (Worldwide Instant Access)
- **Paperback & Kindle on Amazon:** Search Google for “*AI Front Desk for HVAC, Plumbing & Home Services Sanjay Shharma*”

Sanjay Shharma is an Author, Corporate Executive Mentor, and Technology Strategist holding an M.Sc., MBA, and APSCM from the prestigious **Indian Institute of Management (IIM) Calcutta**, with over thirty years of executive management and business leadership.

He architected **The AI Mastery & Receptionist Series** because modern enterprises are overwhelmed by repetitive operational bottlenecks, missed high-ticket phone calls, and high employee churn. Instead of theoretical AI jargon, his frameworks provide battle-tested, zero-code and low-code automated software fleets that capture revenue 24/7.

Author Credentials & Strategic Ecosystem:

Academic Alumni	Indian Institute of Management Calcutta (IIM Calcutta) • APSCM
Specialization	Autonomous AI Agents, Voice AI Receptionists & B2B Operational Scaling

THE 48-BOOK MASTER AUTHOR CATALOG • PART 1

Flagship Works by Sanjay Shharma • Published Worldwide by Adorise Digital

1. THE CARE COLLECTION (14 Flagship Volumes • Marital Health, Aging & Healing)

- #1 **Still Married, Just Silent** — 14 conversations to reopen an emotionally quiet marriage
- #2 **The Quiet Care** — How to give and receive care in a marriage that lasts
- #3 **The Second Chapter** — Rebuilding identity, purpose, and daily joy after caregiving
- #4 **The Second Honeymoon** — Reigniting romance, vulnerability, and play after kids leave
- #5 **The Survivor** — Compassionate protocol when one spouse is left behind
- #6 **The Long Hello** — How couples 50–70 reconnect after the last child leaves
- #7 **When They Forget Your Name** — Navigating dementia, cognitive decline, and memory care
- #8 **Gray Divorce** — Coming back together (or parting) with financial dignity at 55+
- #9 **The Last Sandwich** — Caring for aging parents, spouse, and self at the same time
- #10 **The Long Goodbye** — When your spouse is dying and the marriage is still yours
- #11 **Remarried at 60** — Blending adult families, estates, and hearts in sunset years
- #12 **After the Last Goodbye** — Practical and emotional roadmap for first 365 days of loss
- #13 **The Friends Who Fade** — Why friendships disappear in midlife & building adult tribes
- #14 **Hum Ladte Nahi (Hinglish)** — Shaadi ko wapas kholne ka 30-din ka practical plan (India)

2. THE AI MASTERY & VOICE AUTOMATION FLEET (10 Volumes • Agency & Operations)

- #15 **The AI Agent Blueprint** — Building, deploying, and monetizing autonomous software fleets
- #16 **The AI Agency Playbook** — From zero to \$50,000/month offering turnkey AI automation
- #17 **The AI Content Agent** — Autonomous video, social scheduling, and programmatic SEO
- #18 **The AI Agent Action Workbook** — Interactive architecture schemas, code snippets, and worksheets
- #19 **The AI Agent Cheat Sheets** — 50+ battle-tested system prompts for client deployment
- #20 **Never Miss Another Call** — How front-desk voice AI captures \$100,000 in lost revenue
- #21 **The AI Receptionist Blueprint** — Architecture, Twilio SIP trunking, and CRM integration
- #22 **The AI Receptionist Buyer's Guide** — What founders must know before buying or deploying
- #23 **AI Front Desk for HVAC & Home Services** — Capturing emergency dispatch calls 24/7 without missed leads
- #24 **AI Front Desk for Law Firms & Clinics** — Qualifying high-net-worth client consultations automatically
