THE AI RECEPTIONIST BLUEPRINT

How to Set Up Your AI Phone System in 7 Days (No Code)

The Hands-On Playbook for Small Business Owners Who Want to Deploy Without Hiring a Developer

By Sanjay Shharma

INTRODUCTION

You have decided to deploy an AI receptionist. You have read the math. You have understood the missed-call crisis. You have picked a vendor. You have signed the contract.

Now you need to actually deploy it.

This book is the hands-on playbook. The book is what you read between signing the contract and going live. The book is the day-by-day guide that takes you from "I just paid for an AI receptionist" to "I have a working AI receptionist that captures every call."

In the next 200+ pages, you will learn:

- **Day 1:** The 5-minimum-viable-configuration that gets you 80% of the value
- **Day 2:** The 10 scripts every AI receptionist must have (copy-paste ready)
- **Day 3:** The 3 integrations to set up (calendar, CRM, phone)
- **Day 4:** The 7 escalation rules that route calls to the right human
- **Day 5:** The soft launch protocol (the 4-hour live test)

- **Day 6:** The 24-hour optimization routine
- **Day 7:** The weekly review template + the 90-day plan

This is the no-code version. You do not need to write code. You do not need to hire a developer. You do not need to learn Python or JavaScript. You need to follow the steps. You need to copy the scripts. You need to test the integrations.

The book is written for the non-technical small business owner who wants to deploy the AI receptionist in 7 days without hiring anyone.

The book is the same playbook I use when advising clients on \$10K+ AI deployments. The playbook works for \$79/month plans. The playbook works for \$2,500/month plans. The playbook is the foundation of the deployment.

Let's go.

□ KEY TAKEAWAYS

- You have decided to deploy an AI receptionist. You have read the math. You have understood the missed-call crisis. You have picked a vendor. You have signed the contract.
- The book is written for the non-technical small business owner who wants to deploy the AI receptionist in 7 days without hiring anyone.
- **Day 1:** The 5-minimum-viable-configuration that gets you 80% of the value
- **Day 2:** The 10 scripts every AI receptionist must have (copy-paste ready)
- **Day 4:** The 7 escalation rules that route calls to the right human
- **Day 3:** The 3 integrations to set up (calendar, CRM, phone)
- **Day 5:** The soft launch protocol (the 4-hour live test)

PART 1: THE 7-DAY DEPLOYMENT PLAN

PHASE 1: SEE THE PROBLEM

CHAPTER 1: THE 5-MINUTE MINIMUM VIABLE CONFIGURATION

If you only have 5 minutes before you need to take a call, here is the minimum viable configuration. The configuration is the foundation of every deployment. The configuration is what every successful deployment starts with.

The 5 Settings That Matter

You do not need to configure 100 settings on day 1. You need to configure 5. The 5 settings cover 80% of the value. The 5 settings are:

Setting 1: Business hours. Define when the office is open. The AI needs to know when to answer normally vs after hours.

Setting 2: Greeting. The first thing the AI says when it picks up. The greeting sets the tone for the entire call.

Setting 3: Emergency keywords. The words that trigger immediate escalation. The keywords are "burst pipe," "no AC," "toothache," "car accident," "arrested."

Setting 4: On-call contact. The phone number the AI calls when an emergency is detected.

Setting 5: Voicemail fallback. What happens if the AI fails or the caller wants to leave a message.

The 5 settings are the foundation. The 5 settings are what every AI needs. The 5 settings take 5 minutes to configure.

Setting 1: Business Hours

Step-by-step:

- Open your vendor's dashboard

- Navigate to "Business Hours" or "Operating Hours"

Set the days and times your office is open

Set the time zone (make sure it matches your local time zone)

Save

Example configuration:

- Monday: 8:00 AM - 6:00 PM
- Tuesday: 8:00 AM - 6:00 PM
- Wednesday: 8:00 AM - 6:00 PM
- Thursday: 8:00 AM - 6:00 PM
- Friday: 8:00 AM - 6:00 PM
- Saturday: 9:00 AM - 2:00 PM
- Sunday: Closed
- Time zone: America/Phoenix

The business hours are the foundation. The AI uses the business hours to determine when to answer normally vs after hours. The AI uses the business hours to determine when to escalate vs when to take a message.

Setting 2: Greeting

Step-by-step:

Open your vendor's dashboard

Navigate to "Greeting" or "Opening Message"

Type your greeting

Choose a voice (or upload a voice clone)

Test the greeting with a sample call

Save

Example greeting:

"Thanks for calling Cool Air HVAC, this is Sarah, your AI assistant. How can I help you today?"

The greeting is the foundation. The greeting sets the tone. The greeting tells the caller they have reached the right business. The greeting invites the caller to state their need.

Pro tip: Keep the greeting under 10 seconds. Callers want to get to their need quickly. A long greeting wastes their time and makes them frustrated.

Setting 3: Emergency Keywords

Step-by-step:

Open your vendor's dashboard

Navigate to "Escalation Rules" or "Emergency Keywords"

Add the keywords for your industry

Add the action (route to on-call, send SMS, etc.)

Test with sample calls

Save

Example emergency keywords for HVAC:

- "no AC" → Route to on-call
- "no heat" → Route to on-call
- "burst" → Route to on-call
- "leak" → Route to on-call
- "gas" → Route to on-call + send SMS alert
- "sparking" → Route to on-call

Example emergency keywords for plumbing:

- "burst pipe" → Route to on-call
- "flooding" → Route to on-call
- "sewer" → Route to on-call
- "no water" → Route to on-call
- "gas" → Route to on-call

Example emergency keywords for dental:

- "toothache" → Offer same-day appointment
- "knocked out" → Offer immediate appointment
- "swelling" → Offer same-day appointment
- "abscess" → Offer same-day appointment

- "bleeding" → Offer same-day appointment

The emergency keywords are the foundation. The keywords trigger the escalation. The keywords ensure the urgent calls get answered. The keywords are the difference between capturing the call and losing the call.

Setting 4: On-Call Contact

Step-by-step:

Open your vendor's dashboard

Navigate to "Escalation Contacts" or "On-Call"

Add the on-call person's name

Add the on-call person's phone number

Set the on-call schedule (who is on call when)

Test by triggering an emergency keyword

Save

Example on-call contact:

- Name: Mike Johnson
- Phone: +1-602-555-0100
- Schedule: Monday-Friday 6 PM - 8 AM, weekends, holidays

The on-call contact is the foundation. The on-call contact is who the AI calls when an emergency is detected. The on-call contact is the human who takes the urgent calls. The on-call contact is the safety net.

Setting 5: Voicemail Fallback

Step-by-step:

Open your vendor's dashboard

Navigate to "Fallback" or "Voicemail"

Add the fallback message

Add the email/phone for voicemail notifications

Test by simulating an AI failure

Save

Example voicemail fallback:

"We're sorry, our AI assistant is temporarily unavailable. Please leave a message with your name and phone number, and we'll call you back within 1 hour."

The voicemail fallback is the foundation. The fallback handles the edge cases. The fallback handles the AI failures. The fallback handles the callers who want to leave a message instead of talking to the AI.

The 5-Minute Check

After configuring the 5 settings, do a 5-minute check:

Call the AI from your phone. Verify the greeting.

Say an emergency keyword. Verify the escalation.

Say a non-emergency question. Verify the response.

Call during business hours. Verify the normal behavior.

Call after hours. Verify the after-hours behavior.

The 5-minute check is the foundation of the deployment. The check is the foundation of the confidence. The check is the foundation of the go-live.

Your Action Step

Configure the 5 settings on your AI receptionist dashboard. Do the 5-minute check. Confirm the AI is answering correctly. The configuration is the foundation of the 7-day plan.

□ KEY TAKEAWAYS

□ The greeting is the foundation. The greeting sets the tone. The greeting tells the caller they have reached the right business. The greeting invites the caller to state their need.

□ Configure the 5 settings on your AI receptionist dashboard. Do the 5-minute check. Confirm the AI is answering correctly. The configuration is the foundation of the 7-day plan.

□ "We're sorry, our AI assistant is temporarily unavailable. Please leave a message with your name and phone number, and we'll call you back within 1 hour."

□ The 5-minute check is the foundation of the deployment. The check is the foundation of the confidence. The check is the foundation of the go-live.

□ You do not need to configure 100 settings on day 1. You need to configure 5. The 5 settings cover 80% of the value. The 5 settings are:

□ The 5 settings are the foundation. The 5 settings are what every AI needs. The 5 settings take 5 minutes to configure.

□ "Thanks for calling Cool Air HVAC, this is Sarah, your AI assistant. How can I help you today?"

CHAPTER 2: THE 10 SCRIPTS EVERY AI RECEPTIONIST MUST HAVE

The 10 scripts below are the foundation of every AI receptionist deployment. The 10 scripts cover 80% of the calls your business receives. The 10 scripts are what every small business owner should configure.

Each script includes:

- The trigger (when the AI should use it)
- The exact words the AI should say
- The configuration steps
- A real-world example

Script 1: Greeting (Trigger: Call comes in)

AI says: "Thanks for calling [Business Name], this is [AI Name], your AI assistant. How can I help you today?"

Configuration:

Open your vendor's dashboard

Navigate to "Greeting" or "Opening Message"

Replace [Business Name] and [AI Name] with your values

Test the greeting

Save

Example: "Thanks for calling Cool Air HVAC, this is Sarah, your AI assistant. How can I help you today?"

Pro tip: The greeting should be under 10 seconds. Long greetings waste the caller's time.

Script 2: Hours Question (Trigger: Caller asks "What are your hours?")

AI says: "We're open [hours], [days]. Would you like to schedule an appointment?"

Configuration:

Navigate to "FAQ" or "Common Questions"

Add the script

Test by asking "What are your hours?"

Save

Example: "We're open Monday-Friday 8 AM to 6 PM, Saturday 9 AM to 2 PM, closed Sunday. Would you like to schedule an appointment?"

Script 3: Location Question (Trigger: Caller asks "Where are you located?")

AI says: "We're at [address]. Would you like directions, or would you like to schedule an appointment?"

Configuration:

Navigate to "FAQ"

Add the script with your address

Test

Save

Example: "We're at 1234 Main Street, Phoenix, AZ 85001. Would you like directions, or would you like to schedule an appointment?"

Script 4: Service Area Question (Trigger: Caller asks "Do you serve [area]?")

AI says: "We serve [area] and the surrounding 25-mile radius. What's your address?"

Configuration:

Navigate to "FAQ"

Add the script with your service area

Test

Save

Example: "We serve Phoenix and the surrounding 25-mile radius, including Scottsdale, Tempe, Mesa, and Chandler. What's your address?"

Script 5: Pricing Question (Trigger: Caller asks "How much does [service] cost?")

AI says: "Our [service] starts at [price]. The exact cost depends on [factors]. Would you like to schedule a free estimate?"

Configuration:

Navigate to "FAQ"

Add the script for each service

Test

Save

Example: "Our AC tune-up starts at \$89. The exact cost depends on the system type and any additional repairs needed. Would you like to schedule a free estimate?"

Script 6: New Appointment Booking (Trigger: Caller asks to book)

AI says: "I can help with that. What day works better for you? And can I get your name, address, and phone number?"

Configuration:

Navigate to "Appointment Booking"

Set the available days and times

Set the required fields (name, address, phone)

Connect to your calendar

Test by booking a sample appointment

Save

Example: "I can help with that. We have availability next Tuesday at 10 AM or Thursday at 2 PM. Which works better? And can I get your name and address?"

Script 7: Cancellation (Trigger: Caller asks to cancel)

AI says: "I'm sorry to hear that. Can I get your name and the date of the appointment? I'll cancel it for you right now."

Configuration:

Navigate to "Cancellation"

Set the required fields

Connect to your calendar

Test by cancelling a sample appointment

Save

Example: "I'm sorry to hear that. Can I get your name and the date of the appointment? I'll cancel it for you right now, and we can reschedule when you're ready."

Script 8: Reschedule (Trigger: Caller asks to reschedule)

AI says: "No problem. Can I get your name and the date of the current appointment? I can find a new time that works better for you."

Configuration:

Navigate to "Reschedule"

Set the required fields

Connect to your calendar

Test

Save

Example: "No problem. Can I get your name and the date of the current appointment? Let me check availability... We have next Wednesday at 11 AM or Friday at 3 PM. Which works better?"

Script 9: Emergency Escalation (Trigger: Caller mentions emergency)

AI says: "I'm escalating this right now. Please don't try to fix it yourself. Can I get your name, address, and best callback number? Our on-call [technician/plumber/dentist/attorney] will call you back within 5 minutes."

Configuration:

- Navigate to "Escalation Rules"

- Add the emergency keywords

- Set the action: route to on-call + send SMS alert

- Test by triggering the keywords

- Save

Example: "I'm escalating this right now. Please turn off the main water valve if you can. Can I get your name, address, and best callback number? Our on-call plumber will call you back within 5 minutes."

Script 10: After-Hours Greeting (Trigger: Call comes in after hours)

AI says: "Thanks for calling [Business Name]. Our office is currently closed. If this is a life-threatening emergency, please hang up and dial 911. Otherwise, I can connect you with our on-call [technician/plumber/dentist/attorney], or I can schedule an appointment for tomorrow. Which would you prefer?"

Configuration:

- Navigate to "After-Hours Behavior"

- Add the script

- Set the routing: on-call for emergencies, schedule for non-emergencies

Test by calling after hours

Save

Example: "Thanks for calling Cool Air HVAC. Our office is currently closed. If this is a life-threatening emergency, please hang up and dial 911. Otherwise, I can connect you with our on-call technician, or I can schedule an appointment for tomorrow. Which would you prefer?"

The 10-Script Test

After configuring the 10 scripts, do a comprehensive test:

Call the AI. Test the greeting.

Ask about hours. Test the hours script.

Ask about location. Test the location script.

Ask about service area. Test the service area script.

Ask about pricing. Test the pricing script.

Book an appointment. Test the booking script.

Cancel an appointment. Test the cancellation script.

Reschedule an appointment. Test the reschedule script.

Say an emergency keyword. Test the escalation script.

10. Call after hours. Test the after-hours script.

The 10-script test is the foundation. The test is the proof that the AI is working. The test is the proof that the deployment is complete.

Your Action Step

Configure the 10 scripts on your AI receptionist dashboard. Customize the scripts for your business. Do the 10-script test. The 10 scripts are the foundation of the AI's quality.

KEY TAKEAWAYS

- Configure the 10 scripts on your AI receptionist dashboard. Customize the scripts for your business. Do the 10-script test. The 10 scripts are the foundation of the AI's quality.
- The 10-script test is the foundation. The test is the proof that the AI is working. The test is the proof that the deployment is complete.
- Script 5: Pricing Question (Trigger: Caller asks "How much does [service] cost?")
- Script 4: Service Area Question (Trigger: Caller asks "Do you serve [area]?")
- Script 3: Location Question (Trigger: Caller asks "Where are you located?")
- Script 2: Hours Question (Trigger: Caller asks "What are your hours?")
- Set the routing: on-call for emergencies, schedule for non-emergencies

CHAPTER 3: THE 3 INTEGRATIONS (CALENDAR, CRM, PHONE)

The 3 integrations are the foundation of the AI's value. The integrations are what connect the AI to your existing systems. The integrations are what make the AI feel like a real member of your team.

Integration 1: Calendar (Google Calendar or Outlook)

Why it matters: The AI needs to book appointments in your real calendar. The calendar integration is what prevents double-booking. The calendar integration is what makes the AI's appointments visible to you and your team.

Step-by-step setup (Google Calendar):

- Open your vendor's dashboard

- Navigate to "Integrations" → "Calendar"

- Click "Connect Google Calendar"

- Sign in to your Google account

- Grant permission to access your calendar

- Select the calendar you want the AI to use (usually a "Bookings" calendar)

- Set the available days and times

- Set the appointment duration (usually 30, 60, or 90 minutes)

- Set the buffer time between appointments (usually 15-30 minutes)

10. Test by booking a sample appointment

11. Verify the appointment appears in your Google Calendar

12. Save

Step-by-step setup (Outlook):

Navigate to "Integrations" → "Calendar"

Click "Connect Outlook"

Sign in to your Microsoft account

Grant permission

Select the calendar

Set the available days/times

Set the appointment duration

Set the buffer time

Test

10. Save

Troubleshooting tips:

- If the AI is booking outside business hours, check the available days/times setting
- If double-booking is happening, increase the buffer time
- If the appointment is not showing in your calendar, check the calendar connection
- If the customer is getting the wrong time, verify the time zone setting

Real-world example (HVAC company in Phoenix):

- Calendar: Google Calendar
- Available: Monday-Friday 8 AM - 6 PM, Saturday 9 AM - 2 PM
- Appointment duration: 90 minutes for service calls, 60 minutes for estimates
- Buffer: 30 minutes between appointments
- Test: AI booked a sample appointment, owner verified it appeared in Google Calendar

Integration 2: CRM (HubSpot, Salesforce, Zoho, Pipedrive)

Why it matters: The AI needs to log calls, create contacts, and update deals in your CRM. The CRM integration is what gives

you visibility into the AI's performance. The CRM integration is what enables the follow-up.

Step-by-step setup (HubSpot):

Navigate to "Integrations" → "CRM"

Click "Connect HubSpot"

Sign in to your HubSpot account

Grant permission

Map the AI's fields to your HubSpot fields (e.g., name → First Name + Last Name, phone → Phone Number)

Set the action: "Create new contact for every new caller"

Set the action: "Log call activity for every call"

Set the action: "Update contact with call outcome"

Test by calling the AI

10. Verify the contact was created in HubSpot

11. Verify the call was logged

12. Save

Step-by-step setup (Salesforce):

Navigate to "Integrations" → "CRM"

Click "Connect Salesforce"

Sign in to your Salesforce account

Grant permission

Map the fields

Set the actions (create lead, log call, update opportunity)

Test

Save

Troubleshooting tips:

- If contacts are not being created, check the field mapping
- If duplicate contacts are being created, enable the dedup setting
- If call logs are missing, check the activity logging setting
- If the wrong contact is being updated, verify the contact identification logic

Real-world example (law firm in London):

- CRM: Clio (legal-specific)
- Map: name → Client Name, phone → Phone, case type → Matter Type
- Actions: Create new contact, log call activity, create matter
- Test: AI booked a consultation, owner verified the matter was created in Clio

Integration 3: Phone System (Your Existing Phone Number)

Why it matters: The AI needs to answer calls coming to your business phone. The phone integration is what gives the AI your business number. The phone integration is what makes the AI feel like your front desk.

Setup Option 1: Forwarding (most common)

Navigate to "Integrations" → "Phone"

Get the AI's forwarding number (a number the AI provides)

Set up call forwarding on your existing phone:

- Dial *72 (most US carriers) or your carrier's forwarding code
- Enter the AI's forwarding number
- Wait for confirmation

Test by calling your business number

Verify the AI answers

Setup Option 2: Porting (more advanced)

Navigate to "Integrations" → "Phone"

Request a number port from your AI vendor

Provide your current phone account details

Wait 3-7 days for the port to complete

Test by calling your business number

Verify the AI answers

Setup Option 3: New Number (for testing)

Navigate to "Integrations" → "Phone"

Get a new phone number from the AI vendor

Set up call forwarding from your existing number to the new number

Test

Once validated, switch to forwarding or porting

Troubleshooting tips:

- If the AI is not answering, check the forwarding setup
- If the caller hears a busy signal, check the AI's capacity
- If the call quality is poor, check the network connection
- If the call drops, check the escalation routing

Real-world example (dental practice in Chicago):

- Phone: Forwarding from existing number
- AI's number: +1-312-555-0100
- Forwarding code: *72
- Test: Called the business number, AI answered within 2 rings
- Result: Answer rate went from 70% to 96% in 7 days

The 3-Integration Test

After configuring the 3 integrations, do a comprehensive test:

Call the AI. Book an appointment. Verify it appears in your calendar.

Call the AI. Verify the contact is created in your CRM.

Call the AI. Verify the call is logged in your CRM.

Call the AI. Reschedule the appointment. Verify the change appears in your calendar.

Call the AI. Cancel the appointment. Verify the cancellation appears in your calendar.

The 3-integration test is the foundation. The test is the proof that the integrations are working. The test is the proof that the AI is connected to your business.

Your Action Step

Set up the 3 integrations. Do the 3-integration test. The integrations are the foundation of the AI's value. The integrations are what make the AI a real member of your team.

☐ KEY TAKEAWAYS

- ☐ Set up the 3 integrations. Do the 3-integration test. The integrations are the foundation of the AI's value. The integrations are what make the AI a real member of your team.
- ☐ The 3-integration test is the foundation. The test is the proof that the integrations are working. The test is the proof that the AI is connected to your business.
- ☐ Map the AI's fields to your HubSpot fields (e.g., name → First Name + Last Name, phone → Phone Number)
- ☐ Call the AI. Cancel the appointment. Verify the cancellation appears in your calendar.
- ☐ Call the AI. Reschedule the appointment. Verify the change appears in your calendar.
- ☐ If the AI is booking outside business hours, check the available days/times setting
- ☐ Test: AI booked a sample appointment, owner verified it appeared in Google Calendar

ABOUT THE AUTHOR & THE AI MASTERY FLEET

Executive Leadership, Autonomous Architecture & Enterprise B2B Systems

ENJOYED THIS FREE OPENING SAMPLE?

You have just experienced the foundational chapters of **The AI Receptionist Blueprint**. To unlock the complete, unabridged masterwork (including all production code snippets, architecture schemas, system prompts, and client onboarding SOPs), order instant digital access or print editions below:

- **Official Digital Store:** <https://books.adorisedigital.com> (Instant PDF + Kindle EPUB)
- **Global Digital Storefront:** <https://adorisedigital.gumroad.com> (Worldwide Instant Access)
- **Paperback & Kindle on Amazon:** Search Google for “*The AI Receptionist Blueprint Sanjay Shharma*”

Sanjay Shharma is an Author, Corporate Executive Mentor, and Technology Strategist holding an M.Sc., MBA, and APSCM from the prestigious **Indian Institute of Management (IIM) Calcutta**, with over thirty years of executive management and business leadership.

He architected **The AI Mastery & Receptionist Series** because modern enterprises are overwhelmed by repetitive operational bottlenecks, missed high-ticket phone calls, and high employee churn. Instead of theoretical AI jargon, his frameworks provide battle-tested, zero-code and low-code automated software fleets that capture revenue 24/7.

Author Credentials & Strategic Ecosystem:

THE 48-BOOK MASTER AUTHOR CATALOG • PART 1

Flagship Works by Sanjay Shharma • Published Worldwide by Adorise Digital

1. THE CARE COLLECTION (14 Flagship Volumes • Marital Health, Aging & Healing)

- #1 **Still Married, Just Silent** — 14 conversations to reopen an emotionally quiet marriage
- #2 **The Quiet Care** — How to give and receive care in a marriage that lasts
- #3 **The Second Chapter** — Rebuilding identity, purpose, and daily joy after caregiving
- #4 **The Second Honeymoon** — Reigniting romance, vulnerability, and play after kids leave
- #5 **The Survivor** — Compassionate protocol when one spouse is left behind
- #6 **The Long Hello** — How couples 50–70 reconnect after the last child leaves
- #7 **When They Forget Your Name** — Navigating dementia, cognitive decline, and memory care
- #8 **Gray Divorce** — Coming back together (or parting) with financial dignity at 55+
- #9 **The Last Sandwich** — Caring for aging parents, spouse, and self at the same time
- #10 **The Long Goodbye** — When your spouse is dying and the marriage is still yours
- #11 **Remarried at 60** — Blending adult families, estates, and hearts in sunset years
- #12 **After the Last Goodbye** — Practical and emotional roadmap for first 365 days of loss
- #13 **The Friends Who Fade** — Why friendships disappear in midlife & building adult tribes
- #14 **Hum Ladte Nahi (Hinglish)** — Shaadi ko wapas kholne ka 30-din ka practical plan (India)

2. THE AI MASTERY & VOICE AUTOMATION FLEET (10 Volumes • Agency & Operations)

- #15 **The AI Agent Blueprint** — Building, deploying, and monetizing autonomous software fleets
- #16 **The AI Agency Playbook** — From zero to \$50,000/month offering turnkey AI automation
- #17 **The AI Content Agent** — Autonomous video, social scheduling, and programmatic SEO
- #18 **The AI Agent Action Workbook** — Interactive architecture schemas, code snippets, and worksheets
- #19 **The AI Agent Cheat Sheets** — 50+ battle-tested system prompts for client deployment
- #20 **Never Miss Another Call** — How front-desk voice AI captures \$100,000 in lost revenue
- #21 **The AI Receptionist Blueprint** — Architecture, Twilio SIP trunking, and CRM integration
- #22 **The AI Receptionist Buyer's Guide** — What founders must know before buying or deploying
- #23 **AI Front Desk for HVAC & Home Services** — Capturing emergency dispatch calls 24/7 without missed leads
